SUMMARY

Product-minded technology professional with 2+ years defining requirements, decision logic, and success metrics for enterprise platforms used by 20,000+ employees across a Fortune 500 telecom network. Experienced in translating ambiguous operational problems into structured specs (BRDs, functional specs, decision trees, PRDs) that engineering teams build against, with a track record of measurable adoption and efficiency gains across 21 circles. Comfortable working directly with data (SQL, Python, Power BI) to validate product decisions and drive cross-functional stakeholder alignment. Seeking Product Engineer / Associate Product Manager roles where technical fluency and requirements ownership both matter.

CORE SKILLS

Product & Requirements: BRDs & Functional Specs, PRDs, Requirements Gathering, Process/Decision Mapping, Stakeholder Alignment, Roadmap Prioritization, UAT & Acceptance Criteria, Cross-functional Collaboration

Data & Analytics: Power BI, Advance Excel, SQL, Python, KPI Design, Statistical Analysis, Dashboarding

Tools & Platforms: Jira, Confluence, Figma, Microsoft Visio, ServiceNow, BMC Helix Remedy, Git/GitHub, Trello

EXPERIENCE

Assistant Manager, Network NOC Process & Capability - Bharti Airtel Limited

Jul 2024 - Present

Owns requirements and decision-logic design for governance and change-management platforms used across Airtel's national network operations.

- **Owns end-to-end requirements and rollout sequencing for a 6-module change-management platform (CMS):** Roster, Scheduling, Auto Assignment, Plan Validation, and Impact Analysis.
- **Delivered 5 of 6 CMS modules to production**, translating operational pain points into functional specs and contributing to 250 FTE in productivity savings.
- **Leading rollout of the CMS Approvals module** (final module), projected to add ~30 additional FTE in savings upon completion.
- **Authored the BRD and functional specification for ARC**, a centralized automated approval engine consolidating CRQ governance across the network.
- **Designed and shipped an auto-approval workflow** correlating ARC data against Access Requests in ServiceNow, cutting approval decision time from ~45 to ~5 minutes and saving 15 FTE.
- **Defined product requirements and decision logic for NERVE**, an AI-powered CRQ risk-assessment engine with a 6-factor risk-scoring model and 10+ conflict/deviation-detection scenarios.
- **Scaled NERVE PAN India across 21 circles**, flagging 5,000+ conflict/deviation cases per month and reducing network outages by 15%.
- **Built a Power BI operations dashboard** giving leadership real-time visibility into automation adoption and raising compliance by 20% across circles.
- **Rolled out the UDAAN escalation framework**, aligning cross-circle stakeholders to design 30+ automated workflows and cut resolution delays by 25%.
- **Enabled real-time performance monitoring** for the UDAAN framework through dedicated Power BI dashboards adopted NOC-wide.
- **Authored UAT observation sheets and leadership status trackers** for the CMS Scheduler module, aligning engineering and operations stakeholders.
- **Recognized for delivery impact across 3 award cycles:** Two Airtel Ace Awards (Roster; CMS Auto Assignment, Plan Validation & Impact Analysis) and a Collaboration & Influence Award (ARC).

Graduate Engineer Trainee (Intern) - Bharti Airtel Limited

Feb - Jul 2024

- **Built and launched a monitoring dashboard from scratch: Analysed 1,200+ telecom alarms from the NMS** using SQL and Python, **reducing false alarms by 17%**, the output is fed into a Netcool monitoring dashboard used daily by 50+ NOC team members, **saving 2 hours per day**.

EDUCATION

B. Tech, Computer Science & Engineering (2020-2024) - Guru Nanak Dev Engineering College, Ludhiana

CGPA: 9.07 / 10
